To whom it may concern,

As the Chief Engineer for the Park Inn, we are a very busy hotel with many cleaning challenges. I have tried many good quality cleaning products over the years and have been satisfied with many of them when it comes to regular cleaning.

However as many of us know with some of the duties involved with good housekeeping in our industry it usually takes a lot more than regular cleaning.

Stan Schaefer of Tile Safe Products introduced us to their biodegradable antibacterial cleaner degreaser known as the Multi Kleen.

We have found the Multi Kleen to be every bit as effective in all areas as we were assured it would be.

We are very satisfied with the results and highly recommend the "Multi Kleen™".

Tony Diaz,
Chief Engineer
Park Inn
